Innovative software engineer and mental health advocate with experience in developing impactful tech solutions, including Serenimind, a mental health platform offering AI-driven support and professional consultations. Skilled in full-stack development, team leadership, and community engagement, with a strong track record in presenting innovative ideas and fostering strategic partnerships. Passionate about leveraging technology to drive social impact and improve mental wellness.

EXPERIENCE

Babcock University Students' Association
1 year 5 months

Director of Public Relations
August 2024 - Present

1. Leading strategic PR efforts, expanding BUSA's reach with 5,000+ new followers across platforms within 2 months.
2. Overseeing a team of 20+ PR committee members, implementing campaigns that engage 100,000+ students and stakeholders monthly.
3. Producing and distributing newsletters per semester, ensuring timely communication with 15,000+ student.
4. Managing 3 major social media platforms, boosting overall engagement by 45% through targeted content and strategic outreach.

Member, Senate House
July 2023 - July 2024

1. Played an active role in legislative discussions and decision-making processes within the BUSA Senate, representing the student body's interest
2. Collaborated with other Senate members to pass resolutions and amendments on student policies, welfare, and academic matter.
3. Engaged in policy evaluation and provided feedback to improve student governance and campus life.

Member, Finance Committee
July 2023 - July 2024

1. Assisted in budgeting and financial planning for BUSA initiatives, ensuring proper allocation of resources for various student programs.
2. Participated in reviewing and approving financial reports, maintaining oversight of financial transactions and expense tracking.
3. Contributed to discussions on financial strategies to enhance student services and fund distribution.

Secretary, Social Committee
July 2023 - July 2024

1. Managed documentation and communication for the Social Committee, ensuring accurate records of meetings, events, and decision.
2. Coordinated logistics for social events, collaborating with team members to ensure successful execution of campus-wide activities.
3. Communicated committee plans and progress to the BUSA leadership and other stakeholders, promoting transparency.

Serenimind
June 2024 - Present

Founder / CEO

1. Spearheaded the development of SereniMind's key offerings, including AI chatbots (Sereni AI), mood-based activities, games, exercises, and book/movie recommendations tailored to mental health.
2. Implemented user-centric features such as community pages, journals, blogs, and breathing exercises to foster engagement and support mental health journeys.
3. Assembled and led a cross-functional team, fostering collaboration between developers, mental health professionals, and marketers to ensure product alignment with the company's mission.

4. Built partnerships and networked with potential investors, mentors, and stakeholders, including outreach to people from Microsoft Startup for feedback and promotion.

5. Orchestrated the beta testing of SereniMind, collecting feedback to refine product offerings before official market release.

Allforms, Lagos State
April 2023 - Present

Front End Lead

1. Spearhead the implementation of automated build and deployment pipelines, optimizing development processes and ensuring efficient project delivery.

2. Developed user-oriented visuals and features using front-end languages to increase site traffic.

Timingotech
April 2022 - Present

Founder

1. As Timingotech's CTO, I steered web development innovation to new horizons, delivering a game changing solution that ignited partnerships with industry leaders and propelled substantial business growth.

2. As the UX-driven CTO of Timingotech, I transformed web experiences, delivering remarkable innovations that captivated users and set new industry standards.

3. As the visionary CTO at Timingotech, I led the charge in revolutionizing e-commerce with a transformative website, seamlessly blending technology and design to deliver an unparalleled online shopping experience.

Ringwell Projects and Services
April 2021 - Present

Web Developer

1. Code responsive websites using HTML, CSS, JavaScript, and React, ensuring seamless user experiences across devices.

2. Employ cutting-edge software and technologies to enhance website performance and optimize corporate online presence.

UNILAG Design Studio
January 2024 - June 2024

Intern

1. Developed the UNILAG Design Studio website using React JS, ensuring a user-friendly interface and deploying it on Vercel and Whogohost.

2. Worked on a non-invasive blood glucose monitoring system using Arduino and MQ-135 gas sensor, alongside integrating AI for real-time drone control using Raspberry Pi.

3. Led educational programs such as the Ladies in Tech and Girls in Tech, mentoring participants on Arduino, Python, and mechanical fabrication projects. 4. Gained hands-on experience in embedded systems, developing AI models for tasks like currency identification for the visually impaired and drone navigation. 5. Delivered presentations on technical topics such as IoT, AI/ML, and project management, while contributing innovative solutions to global challenges like healthcare technology.
